## **Australian Wildlife Services provides services in:**

- Geographic Information Systems database and image processing, mapping and modelling
- Kangaroo management and sustainable use of wildlife
- Wildlife industries and management techniques to aid conservation
- Wildlife population assessment, fauna surveys and habitat management
- Indigenous land management- integrating traditional knowledge and science
- Wildlife based ecotourism
- Exploring carbon abatement projects under the Carbon Farming Initiative
- Advice on strategic research priorities, environmental planning and monitoring programs
- Veterinary wildlife services

## **AWS has in-house expertise and experience in:**

- **Aerial wildlife surveys and photography using our own aircraft**
- **Use of tranquiliser guns for wildlife restraint and veterinary diagnostic sciences**
- **Soil, water, biodiversity, landscape health monitoring**
- **Map production**
- **Computing and design**
- **Report, journal article and plan preparation**

Our current clients include Indigenous communities and rural landholders, private and public service companies, government and its agencies, tourism operators and zoos.

We have extensive networks in wildlife science, agriculture, conservation and natural resource management.

**Dr George Wilson** is an adjunct Professor at the Australian National University, Fenner School of Environment and Society. He has more than 35 years experience in wildlife and environmental management, strategic policy analysis, and research program management. **Jennifer Smits** is accomplished field ecologist and GIS expert.
